Profile

I automate manual processes and build tools that enhance team productivity -- whether through containerisation, CI/CD pipelines, or automation scripting. I look for patterns in how systems behave and use what I find to make them faster and more reliable.

I am results-driven and thrive on challenges that expand my knowledge and problem-solving skills. Whether optimising deployment workflows or writing automation scripts, I bring a systematic, data-informed approach to every project.

Experience

DevOps Engineer

ICT Strypes | Varna, Bulgaria | June 2022 -- Present

Spearheaded DevOps modernization and automation initiatives, reducing operational overhead through CI/CD optimization, pattern-driven infrastructure analysis, and custom tooling.

- Reduced operational overhead by 40%+ through automated CI/CD pipelines and infrastructure provisioning
- Modernised CI/CD infrastructure by migrating Jenkins pipelines to GitHub Actions, accelerating deployment cycles
- Developed automation scripts in Python, Bash, and Golang to eliminate manual tasks and improve development workflows
- Applied pattern-driven analysis to identify systemic bottlenecks across the delivery pipeline, enabling targeted optimisations that improved release reliability by 30%

Software Development Trainee

MentorMate | Varna, Bulgaria | Feb 2022 -- Mar 2022

Intensive training program focused on modern frontend development practices, culminating in the delivery of robust web applications using the Vue.js ecosystem.

- Built responsive frontend applications leveraging TypeScript, Vue.js, and SASS within tight deadlines
- Mastered modern web development workflows and best practices through hands-on project implementation
- Consistently met project milestones while rapidly adapting to new technologies and requirements

Education

Python Dev Path (full programme)

SoftUni | Jan 2022 -- Nov 2022

Master's Degree in Maritime Navigation

Technical University, Varna | Sep 2016 -- May 2022

Technical Skills

- **Operating Systems:**
Arch, Debian/Ubuntu, OpenSUSE, RHEL
- **DevOps & CI/CD:**
Docker/Podman, GitHub Actions, Jenkins, k8s
- **Programming & Scripting:**
Python, Bash, Golang
- **Version Control & Collab:**
Git, GitHub, Bitbucket, Jira, ClearCase, Confluence
- **Web Technologies:**
Django, Gin, Bootstrap, Vue.js

Courses

- Leadershi Skills Development (Equinox)
- Django (SoftUni)
- GitHub Actions -- The Complete Guide (Udemy)
- DevOps: Containerisation, CI/CD & Monitoring (SoftUni)
- Python OOP (SoftUni)
- Python Advanced (SoftUni)
- Linux System Administration (SoftUni)

Mentoring

- Mentor, IT Master Class 11

University of Economics, Varna

Soft Skills

- Professional integrity
- Adaptability and strong work ethic
- Professional excellence
- Technical problem-solving
- Team collaboration
- AI prompt engineering
- Agile/Scrum
- Strategic time management

Languages

- **English:** Professional working proficiency
